Fnu Tushar

Malvern, PA | (484) 716-7840 | fnu.tushar@outlook.com | Linkedin | Github | Portfolio

Professional Summary

Data engineer building warehouse data pipelines and data quality checks (SQL, Python, Databricks, Docker, AWS), with 5+ years as a data consultant at Oracle and Accenture. MS in Data Analytics, Penn State (Dec 2026); seeking full-time Data Engineer roles.

Technical Skills

Programming: Python (Pandas, NumPy, PySpark, Matplotlib, Plotly), Advanced SQL, Java, R.
Data Engineering: Databricks, Apache Spark, Delta Lake, Unity Catalog, Medallion Architecture(Bronze/Silver/Gold), Dimensional Modeling(Star Schema), Data Warehousing(Fact and Dimension tables), Data Lineage, Monitoring (CloudWatch).
Cloud & DevOps: AWS (S3, Lambda, CloudFormation), Docker, Git, GitHub Actions, CI/CD.
Pipelines & Quality: ETL/ELT, Orchestration(Dagster), REST APIs (FastAPI), Data Quality Frameworks(DQX), Pytest.
BI & AI: Power BI, Tableau, LLM Integration (Llama 3, Claude API), Prompt Engineering, MLflow, Claude Code, VS Code.

Work Experience

Barton Malow May 2026 – Aug 2026
Intern - Data Science *Michigan, United States*

- **Engineered a scheduled, idempotent Databricks pipeline** from Unity Catalog system tables to a star schema, loading 268K+ billing and 1.85M+ query records, verified unique on reruns, and showing 85.6% of $146K spend had no owner.
- **Attributed 8,000+ Claude queries from 20+ users** on shared Databricks compute through a cost pipeline, showing AI's share of serverless warehouse spend grew 5.5x (1.5% to 8.3%) in five months for leadership review.
- **Automated data quality framework** of 211 checks over 23 gold tables, uncovering a 39% completeness gap, then cutting flagged records from 46K to 11K by fixing an over-firing check and emailing owners a weekly digest.

Pennsylvania State University Sep 2025 – May 2026
Research Assistant - Data Science *Pennsylvania, United States*

- **Created an AI-governance data pipeline for MyRaina Inc.** that ingests 14-schema resident activity data, validates against 5 CMS federal rule checks and serves risk classifications through a dashboard and a tamper-evident SHA-256 audit log.
- **Engineered a text ETL workflow** that ingests 120 resumes and 2,277 job descriptions, strips HTML, normalizes text, generates TF-IDF and 384-d SBERT features and batch-scores 273K resume-job pairs with neural match probabilities.

Oracle Corporation Feb 2022 – Dec 2024
Staff Data Consultant *Bangalore, India*

- **Owned billing data accuracy** for 600K+ telecom subscribers: SQL quality checks, anomaly rules and reconciliation held accuracy at 98%+ within SLAs.
- **Automated reporting** for churn and usage KPIs behind leadership dashboards, achieving 99% on-time weekly delivery.
- **Led onsite data testing** for a 15-member team through a 1-month go-live, presenting a declining post-launch bug trend.

Accenture Solutions Pvt Ltd Jun 2019 – Feb 2022
Data Consultant *Pune, India*

- **Resolved 50+ recurring data quality issues** in the production billing database for 4.5M customers, improving accuracy.
- **Improved batch bill-run workflows** in SQL, cutting runtime from 1 day to 2 hours (12x) and manual effort by 92%.
- **Built a SQL validation framework** (reconciliation, exception flags), cutting discrepancies 60% and month-end close 10%.

Education

Pennsylvania State University Pennsylvania, United States
Master of Data Analytics, GPA: 3.96/4 *Aug 2025 – Dec 2026*
Statistical Analysis, Data-Driven Decision Making, Predictive Analytics, Deep Learning, Natural Language Processing, AI Ethics.

KIIT University Odisha, India
Bachelor of Technology in Electronics and Instrumentation Engineering, GPA: 3.3/4 *May 2015 – May 2019*
Control Systems, Digital Electronics, Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence.

Projects

Osteoarthritis Market Visits Share Forecasting Pipeline Live Demo | GitHub
Production data platform that turns 4 IQVIA extracts and 171 public files into an audited warehouse each month and serves it through a containerized AWS Lambda API, a Streamlit site and an AI chat box over a knowledge graph.

- **Developed a re-runnable Bronze/Silver/Gold warehouse** from 4 IQVIA extracts (72 months, 7.19M+ visits), gated by Pandera and 11 quality checks, with SHA-256 ingest audits and a 149K-row star schema (4 dimensions, 2 facts).
- **Automated the monthly ETL and model refit** as a nine-stage Dagster and GitHub Actions run in 73 seconds, publishing SHA-256-verified releases to a versioned S3 bucket with an atomic swap and 0 failed checks.
- **Architected the serving layer on the warehouse:** a Streamlit website and a Claude chat box limited to aggregate tools over the tables and a 311-node, 827-edge graph.

Worldwide Sentiment Analysis of LLM Tweets GitHub
Data pipeline behind an LLM-sentiment analysis of 305K tweets: profiles and normalizes noisy locations, then feeds regional sentiment scoring and forecasting for AI policy teams.

- **Profiled 305K tweets** (36 languages): 33,739 unique location strings, 25% missing, 2,162 duplicate texts.
- **Designed a location-normalization pipeline** (aliases, bio inference, geocoding): Other/Unknown 72.8% to 43.9%.
- **Fed cleaned data to VADER scoring and a SARIMAX forecast** (weekly seasonality) behind an AI-policy brief: Bard/Gemini lowest(0.12 to 0.14), South America falling fastest(0.249 to 0.197).
